Major Infrastructure Contracts

National Gas – Integrated Services

- Multi-discipline asset support
- Inspection, maintenance, & engineering scopes
- Long-term programme creating ongoing opportunities

Scope includes:

- Mechanical & structural maintenance
- Engineering assessment & modification works

Opportunities for supply chain:

Specialist
Fabrication
& Machining

Specialist
Inspection
Services

Equipment
Supply &
Maintenance

Skilled
Labour &
Technical
Specialists

Complex Engineering & Life-extension Scopes

Cruachan Pumped Storage – Specialist Welding

- Critical welding support for major UK hydro infrastructure
- Supporting long-term renewable energy storage capability

Engineering Services (including FEA)

- Structural analysis & integrity assessments
- Specialist design & modification scopes

Supply chain opportunities:

Specialist
Material Supply

Machining
Partners

NDT &
Inspection
Services

Engineering &
Technical
Partners

Offshore, Subsea & Marine Systems

Encomara, subsea & offshore engineering scopes

- SQUID unique mooring & cable system for FOWT
- Specialist, Mooring , Cable & Structural Engineering
- Advisory & industry leadership
- Engineering solutions delivery

Pipeline of similar work expected across:

- Floating Wind
- Offshore Oil & Gas life extension, field development, decommissioning

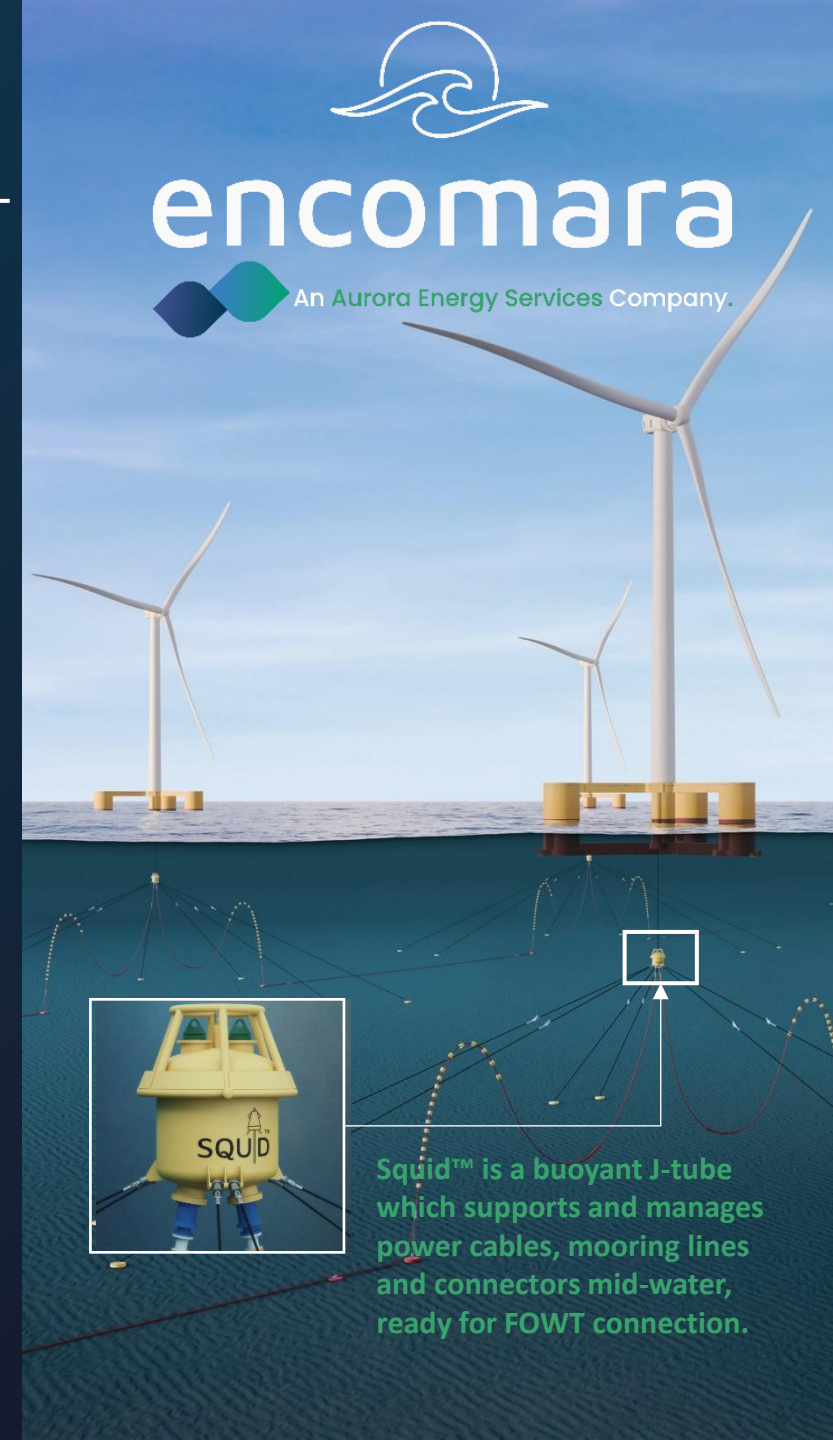

Supply chain opportunities:

System
Integration &
Monitoring

Engineering
Support

Mechanical
Component
Suppliers

Specialist
Coatings

encomara

An Aurora Energy Services Company.

Squid™ is a buoyant J-tube which supports and manages power cables, mooring lines and connectors mid-water, ready for FOWT connection.

UK Wind Projects – Onshore & Offshore

Installation, Decommissioning & MCE

- Pre-assembly, installation & decommissioning
- Major component exchange
- Heavy lift planning & specialist execution
- Project delivery, QA/QC & handover

O&M and Blades

- Full O&M (PPM, corrective, LTSA)
- Inspections & compliance (LOLER / PUWER)
- Blade inspection, repair & performance upgrades
- Spares strategy & performance optimisation

Supply chain opportunities:

Refurbishment
Partners

Supply Chain Challenges

Advanced engineering & fabrication capability:

- Complex structures
- Specialist welding & materials

Access and lifting innovation:

- Improved safety solutions
- More efficient deployment offshore & onshore

Scalable, reliable supply chain capacity:

- Rapid mobilisation
- Technically capable, compliant suppliers

**We are actively seeking partners who can
scale with demand.**

How to Do Business with Aurora?

Engage with Us:

Supplier registration | Procurement engagement | RFQs & tenders | Framework support

What We Value:

Safety | Capability | Reliability | Competitive pricing

Contract Routes:

Subcontract | Framework | Project tender | Tier-2 partner

Let's work together...

Supply Chain & Procurement Contact:

Katie Jordan - procurement@auroraenergy.co

Engineering / Project Enquiries:

Kane Winton - integrated@auroraenergy.co

Encomara Enquiries:

Lisa Tomkins - info@encomara.com
